-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Detailed Action

Abstract

1. The abstract of the disclosure is objected to because it is more than one paragraph. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. **Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.**

Claims 1-10 provide for the use of one or more layers of medical wrap, claims 1 and 8 being independent claims. Then claims 1 and 8 provide structural limitations to the wrap: continuous, rolled or fan folded form, and attachment points. Then claims 1 and 8 provide that the forms may dispense multiple sheets. Dependent claims 2-5 provide structural limitations to a holder for the wrap. Dependent claims 9-10 provide structural limitations to the wrap. Dependent claims 6-7 provide structural limitations to a cutter for the wrap. However, claims 1-10 do not set forth any steps involved in the method of using the wrap. It is unclear what method applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Art Unit: 1734

4. Claims 1-10 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Art of Record

5. The following prior art is made of record: Uland teaches a roll in a dispensing box having a serrated outer edge. Boreali et al. teach a roll in a dispensing means with the material of the roll having transversely located weakened attachment points. Schueler teaches a fan folded material having transversely located weakened attachment points. Chodacki et al. teach a rolled or fan folded material having transversely located attachment points supported on a table. Rossini teaches a heated cutter for a rolled material on a table support. Solovay teaches bandages in roll form with transversely located weakened attachment points on a dispensing box. The material may be fanfolded. Larson teaches bandages in roll form in a box having a cutter. Nakakado et al. teach a heated cutter for bandage material.
